

Different styles
of Head

B

A

C

Subtle curve in the stem ,
Ideal singular or in a pair, look
lovely in borders and as an
addition to a garden .

Due to the size I can get a lot more
shape and curve in stems
This is the option if your looking for
more of a statement piece.

Dandelions at this size are a designed
for the site in mind,
A real show stopper and ideal for
commercial projects too.

Prices

- A £750 + vat
- B £700 + vat
- C £800 + vat

These are to be designed for your space
and specifications , by providing us with
a image of your garden or site we can
recommend what would work and give
you some images and ideas .

Made out of much thicker and higher
tensile wire to withstand the size and
keep shape. There is a lot more to
these than just simply sizing us .

If you wanted a group of three
please ask and we can look at
maybe sizing one up slightly to
give you a better arrangement.

These are installed on site

Prices

- Singular from £1200+vat
- Group of 3 £4000 inc vat

Prices
Start from £3000 a head
But price per project

We are able to design dandelions for any size and shape, outside of the standard sizes ,

All prices exclude delivery and this will be quoted before confirming . 6ft dandelions can be collected from the workshop but anything larger will have to be delivered and installed due to the stillages needed for transporting the heads due to them being separate to the poles

Dandelions are made from stainless steel and as standard come with lacquered copper leaves on the head . Lacquered to keep its shiny orangey appearance even outside .

Photos and images of previous projects can be provided to help you decide.

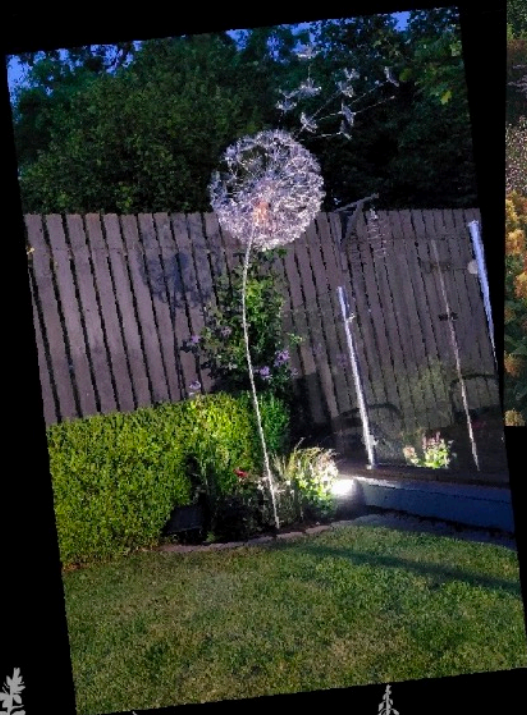

6 Foot Garden Dandelions

Me stood by 6ft dandelion for comparison of size

Style "C" head
(leaves not available)

"A" and "C" in borders

7-9 foot Dandelions

Single 9ft
dandelion style
"B"

9 foot set of 3 ('meadow range')

Me stood by 9ft single dandelion for comparison

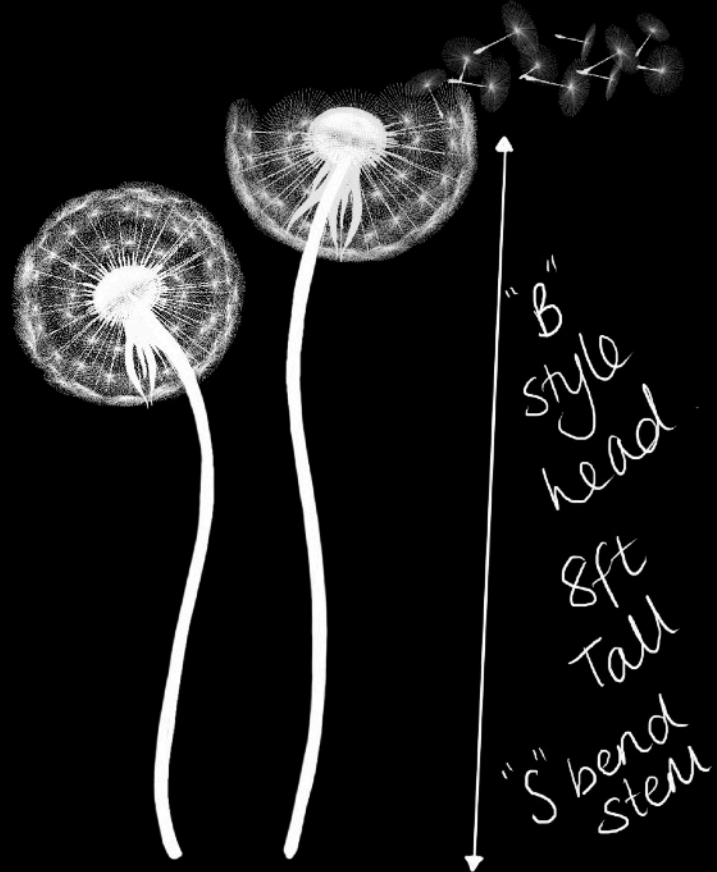

What to do next

If you have read through the information and are still interested in commissioning a dandelion, The next thing is to have an idea of where it is going to be sited and what size and style would be appropriate .

Although on the diagrams show standard sizes 6ft / 9ft dandelions we are able to make to them to any size and shape , so please ask any questions and we can go from there .

Once we have it all completely confirmed we will be able to give you a better idea of timescale in getting it made and delivered to you .

To help with this I can have a look with you and digitally impose an digitally made image of your choice of dandelion onto your garden in different sites and sizes to make sure before we start creating it , we have got it just right .

Installation on site is done by ourselves , so some idea of the ground type would also be helpful.

All dandelions are installed by ourselves, straight into the ground, we have apparatus to make as small, tight hole as needed , generally around 12-18 inches into the ground, deeper with increasing size of dandelion. This will keep the dandelion completely safe structurally and give you the chance if maybe not quite in the right place for you to change your mind, (By the time you've gone in the house and looked from different windows , washing up at the sink)

We look forward to hearing back from you and working with you !

Amey x
